

A Five Step Guide to Going Digital in Food Manufacturing

STEP 01

Start with What's on Paper

Ditch clipboards. Digitizing basic documentation is the fastest first step.

Go digital with:

- Inspection logs
- Batch records
- Inventory forms

STEP 02

Optimize What You Already Do

No need to start from scratch. Small changes can equate to big efficiency gains.

- Map your existing workflows
- Apply digital tools that adapt to your process

STEP 03

Focus on Traceability

Compliance is key and consumers demand transparency. Invest in:

- Smart sensors
- Blockchain for supply chain tracking
- Cloud-based MES for real-time data

STEP 04

Invest Where It Counts

Target high-ROI upgrades:

- Warehouse management systems
- Real-time production dashboards
- Analytics to reduce yield loss
- Spend smart, scale fast.

STEP 05

Train from Within

Your best resource? The people you already have.

- 58% of manufacturers close skills gaps by training from within
- Create internal development programs to build digital skills
